

Raw EPS is the size of a grain of sugar. The bead is then pre-expanded to 40 times its original size

That's like blowing up a tennis ball to the size of a basketball!

**11cm<sup>3</sup>**

One produce box is compacted into 11cm<sup>2</sup> of recyclable material, a 96% reduction in volume!

garden fences

flower pots

clothes hanger

picture frames

Recycled material can be used to make a variety of new products

## Compacting

Boxes are recycled by compacting into bales ready to recycle into new products

**350ml**

of material is used to manufacture a 23 litre produce box

“  
One produce box full of raw EPS could make **65** more boxes.”

## Granulation

Mixed with virgin bead and dosed back into the process to make new boxes
